Nevada County Contractors Association Endorses Karen Hull, NID Division 3 Director

Grass Valley -- The Nevada County Contractors Association Political Action Committee is pleased to announce that it has endorsed Karen Hull, in the 2024 race for NID Division 3 Director

Karen Hull is a fourth generation California native who grew up in Sacramento. She brings 25 years of business leadership experience and over a decade as a flower farming entrepreneur to the Nevada Irrigation District (NID) Division 3.

"After meeting with the candidates in this race, it was clear that Karen Hull has considerable knowledge in a wide range of business and technical areas which is needed to be an effective leader on the NID Board.

"She has a proven record of accomplishments on the Board," said Daniel Swartzendruber, NCCA-PAC Chairman. "Karen's commitment to a transparent process in the Plan for Water has allowed our community of treated water and agricultural users a voice."

Karen has been the Division 3 Director since 2020. During her first term, NID has improved efficiencies in its financial operations, developed comprehensive infrastructure plans, streamlined contracting processes, and increased income without raising rates for three years. In addition, NID developed a comprehensive long-term planning process (The Plan for Water) to prioritize the district's future water supply.

In response to the endorsement, Karen Hull stated "I am very grateful to have the support of the Nevada County Contractors Association and their members in this campaign. Contractors and suppliers are a vital part of our community and we all benefit from a strong partnership. I look forward to continuing to work with NCCA and its members during the Plan for Water and beyond. "

The Nevada County Contractors' Association Political Action Committee is the political advocacy arm of the Nevada County Contractors Association. The goal of the NCCA-PAC is to support candidates who, we feel, have the best understanding of challenges facing small businesses, the community and our local building industry.
